Part 1: Overall Rating

Category	Question	Answer
Overall evaluation	1. How likely would you be to recommend SIGLOC-online to a friend or colleague?	<p>NPS (Net Promoter Score) = 60.7</p>
	2. Explain the reason for the rating above.	<p>Most participants were satisfied with the program and received good stimuli through the experiences in a multinational / cross-cultural learning environment. (The word “eye-opening” stood out, for example.) Participants’ comments indicate that</p> <ul style="list-style-type: none"> • they enjoyed interaction, communication with participants from other countries • their experiences were helpful to gain understanding of issues from different perspectives. <p>On the other hand, many of them felt they needed more time to complete the tasks well. Someone mentioned it was better to narrow down the number and kind of learning platforms used to one to two.</p>

Part 2: Program Organization

Category	Question	Answer
Expectation	1. What made you decide to participate in SIGLOC-online?	<p>Most of the participants stated that:</p> <ol style="list-style-type: none"> 1) they were interested in finding social issues and developing solutions, 2) they were interested in Global warming & climate change, 3) they were willing to work and exchange ideas with friends from other countries. <p>Some reported that:</p> <ol style="list-style-type: none"> 4) recommendation from professor or friends, was their reason for participation.
	2. What did you expect to learn from SIGLOC-online program initially?	<p>Their initial expectations were summarized to:</p> <ol style="list-style-type: none"> 1) learn more about climate change and ways for mitigating it, 2) know different perspectives on global warming and its solutions 3) know about other countries and culture, and 4) work with students in other countries. <p>Two (2) of them were thinking that this program could be like a “Hackathon” company program for selecting students to be granted for study or doing social projects.</p>
Pre-course Procedure	3. Give comments on pre-course procedures (i.e. application process, pre-course guidance, pre-course assignment and so on.)	<p>Most of them answered that instructions in the pre-course procedure were basically clear, but they didn’t have enough time for doing pre-course assignment and having self-study on sub-themes before the program. Below are their major comments.</p> <ul style="list-style-type: none"> • Information was given a bit late, causing preparation to be a bit more rushed and making completing assignments more difficult to finish. Also allow me to research beforehand on the topics. • Tasks needed more time to read and analyze before submitting. In future, may the organizers consider the relationship between quality work/report against short interval of task due dates. • Pre-course session was long. • It was a little tough to get adjusted to all of the new software. • Individual timetable initially asked from us serves no purpose as it

		<p>was not used.</p> <ul style="list-style-type: none"> There was no time for us to chat with colleagues in the same team prior to the program.
Program length	4. Choose the most appropriate one for the program length (including weekend activities).	<p>42.9% of respondents answered that a 2-week program was appropriate, while 35.7% preferred longer than 2 weeks.</p>
	5. For those who chose "others" above, specify the appropriate length for this program.	N/A
Preferable month of the year	6. Choose the convenient month(s) for the students in your school to participate in this kind of program. You can select more than one.	<p>August, September and April are preferable months.</p>
ICT & Software	7. What are the pros and cons of learning online compared to participating in an actual study-abroad program/training?	<p>Pros:</p> <ul style="list-style-type: none"> Easy to participate / attend classes from any location Greatest possibility for people who may not be able to travel abroad Can work in personal schedule Low/minimal cost Work can be viewed/processed at any time. ICT skills are developed Not necessary to stop studies at the university Work can be recorded digitally and communicated in writing <p>Cons:</p> <ul style="list-style-type: none"> Time difference (difficult for having synchronous session) Can't go to Japan to experience culture, atmosphere, actual sceneries Can't communicate well to those with slow Internet connection Face-to-face reaction would really be more immersive Disturbed by daily issues and life obligations at home There may not be a good bond among students comparing to face-to-face

	8. Give some comments on what was difficult and/or needs to be improved regarding the communication environment and software applications that were used in the program.	<p>The biggest concern was the time given to the participants to complete their tasks. Others stated comments on softwares used in the program, communication with colleagues and time management dealing with other daily activities. Below are the major comments:</p> <ul style="list-style-type: none"> ● Timeframe was too little to do research and come up with a good report with quality ● Use Discord or WhatsApp instead of Slack ● Some students weren't very participative ● Screen the participants based on their IT resources ● Length of the program should be extended. ● Don't let European students communicate with Asian students ● Some slides would be overwritten by other students. ● Delete the old threads on our Slack platform so that each SIGLOC program has only its threads. eg March 2021 only ● How to handle tasks simultaneously both from my school and the SIGLOC program
	9. For those who utilize the "pay-as-you-use" system, approximately how much did you spend for connecting the Internet and/or mobile phone services for attending SIGLOC-online in the last two weeks?	It seems that only students in Zambia used a pay-as-you-use system costing approx. \$10 to 280 but the average was around \$20.
