|---|---|
| Project ID | 29 |
| Focus / Field | Environment |
| Country / Region Implemented | Philippines |
| Name of Project / Activity | Reducing Emissions from Deforestation and Forest Degradation (REDD) |
| Project / Activity URL (if any) | https://www.giz.de/en/worldwide/18273.html |
| Target Location | Mindanao, Philippines |
| Purpose of Project / Activity | The REDD project takes a unique approach to forest and climate preservation. It is advising the Philippine government on how to modify its forestry policy in order to promote the REDD+ plan in the country. To that purpose, the project is developing and testing innovative forest conservation techniques in selected forests. |
| Target of Project / Activity | Forest areas in Mindanao |
| Project / Activity Contents | The project aims to protect forests, land tenure clarification, financial support for forest repair and reforestation, and the establishment of agroforestry systems are among these strategies. This strategy includes monitoring and controls, as well as measures to ensure that the outcomes are duplicated in other Philippine forest areas. |
| Name of Implementing Organization | German Federal Ministry for Environment, Nature Conservation, Building and Nuclear Safety (BMUB) |
| Organization URL | https://www.giz.de/en/html/index.html |
| Location of Head Office (City, Country) | Germany |
