

Project ID	43
Focus / Field	Natural resources
Country / Region Implemented	Philippines
Name of Project / Activity	Protect Wildlife Project
Project / Activity URL (if any)	https://faspelib.denr.gov.ph/taxonomy/term/1595
Target Location	Region IVB, Region IX, Palawan, Zamboanga City, Tawi-Tawi
Purpose of Project / Activity	Protect Wildlife project will provide focused effort and resources to align conservation policy with on-the-ground action and enforcement. It is designed to contribute to the reduction of threats to biodiversity and of poaching and use of illegally harvested wildlife and wildlife products. It adopts a multipronged and integrated ecosystems management approach that in the long term will improve ecosystem services and redound to increased wildlife conservation and human well-being.
Target of Project / Activity	Region IVB, Region IX, Palawan, Zamboanga City, Tawi-Tawi
Project / Activity Contents	The project will focus on two pilot areas: the province of Palawan, including Tubbataha Reef; and the Sulu Archipelago, including Zamboanga City and Tawi-Tawi. The project strategy for achieving success and ensuring that the project's impact is sustained is built on an ecosystem approach. This approach seeks to address threats to biodiversity while enabling rigorous integration of conservation outcomes with development objectives, supporting strong local ownership and ensuring that lessons learned are applied at scale.
